Get Your COVID-19 Vaccine Booster Shots Here

Keep up your protection against COVID-19

COVID-19 vaccines continue to work very well at preventing severe illness, hospitalization, and death. A booster shot is an extra dose that helps keep up your protection.

When to get your booster

If you're 5+, you should get your 1st booster as soon as you're eligible:

- 5 months after your 2nd dose of the Pfizer-BioNTech or Moderna vaccine.
- 2 months after your single dose of the Johnson & Johnson vaccine.

You can get a 2nd booster 4 months after your 1st, if you’re:

- 50+ and got the Pfizer or Moderna vaccine.
- 18+ and got the Johnson & Johnson vaccine.
